Turin, 1st August 2026

TO ALL CUSTOMERS

Conflict Minerals

In the Fixi Group due diligence program, there is a constant control of a responsible sourcing of materials.

Our group is perfectly in line with the EICC (Electronic Industry Citizenship Coalition) and GeSI (Global e-Sustainability Initiative) activities related to the origin of metals and minerals from conflict areas.

The Fixi Group hereby certifies that the raw materials used for the production of our items do not contain elements involved in the conflict minerals.

In particular tantalum, tungsten, tin and gold are not used.

Yours faithfully.

CEO
Maurizio Mora
